DETAILED ACTION

Allowable Subject Matter

Indication of allowable subject matter will not be made at this time due to the indefiniteness rejection set forth below.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

Claims 5 and 6 are objected to because of the following informalities: 'trammel' should be changed to --trommel--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12,14-27,29-48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not clear how the ionized gas can perform its' function when gas is being extracted at the same time i.e. isn't the ionized gas extracted to prevent it from performing it's function? Clarification is required.

Claims 20-23,35,37,43,46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 20 and 21, shouldn't 'agitating' be changed to --agitation--? In claims 35,37,43,46, shouldn't 'method' be changed to --apparatus--?
